Grafted Stock

All our grafts are worked on transplanted understock, which is potted early in the Fall in 2¼ inch and 2½ inch rose pots. In grafting the different varieties, we use as understocks the nearest parent and no foreign stock is used. The plants will be individually wrapped and packed in strong containers for shipment, assuring safe arrival. If interested in varieties not listed, same can be made up, if we have advance notice early in the season.
